Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 13, Nos 1–6

Issue No. 1, July 1990

Global Weak Solutions to the Problem of Continuous Sedimentation of an Ideal Suspension: M. C. Bustos, F. Concha and W. Wendland 1

An Existence Theorem for Poiseuille Flow with Surface Tension in an Open Channel: E. B. Hansen and V. A. Solonnikov 23

Some Solutions for the Spin Glass System and for Systems Originating from It: A. Łada 31

An Effective Direct Solution Method for Certain Boundary Element Equations in 3D: A. Meyer and S. Rjasanow 43

A One-dimensional Dynamic Contact Problem in Linear Viscoelasticity: J. U. Kim 55

Low-frequency Asymptotics for Dissipative Maxwell's Equations in Bounded Domains: N. Weck and K. J. Witsch 81

Issue No. 2, August 1990

A Study of a Non-linear Kinetic Model for an Ionized Gas: L. Arlotti, L. Bassi and P. Gamba 95

Zero Resonances in Local Perturbations of Parallel-plane Waveguides: P. Werner 111

Time-invariant Uniqueness for Reacting Viscous Fluids Near Chemical Equilibrium: A. Morro and B. Straughan 137

Asymptotic Analysis of the Quantum Liouville Equation: H. Steinrück 143

Indexed or abstracted by Applied Mechanics Reviews, Boundary Elements Abstracts, Cambridge Scientific Abstracts, Compumath Citation Index, Current Contents, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, SCISEARCH Database, VINITI–USSR Academy of Science and Zentralblatt für Mathematik.

A Two-species Plasma in the Limit of Large Ion Mass: G. Rein 159

On the 'One and One-half Dimensional' Relativistic Vlasov-Maxwell System: R. Glassey and J. Schaeffer 169

Remarks on the Wave Front of Polarization: Polarized Solutions for the Evolution Three-dimensional Lame Systems: K. Chełminski, A. Łada and L. Sidz 181

Issue No. 3, September 1990

Long-time Behaviour of Absorbing Boundary Conditions: B. Engquist and L. Halpern 189

Inversion of the Exponential X-ray Transform. II: Numerics: I. A. Hazou and D. C. Solmon 205

On Non-stationary Flows of Incompressible Asymmetric Fluids: G. Łukaszewicz 219

On a Contact Problem for a System of Parabolic Equations in the Thermal Conductivity of Electric Machines: I: R. Małecki, P. Olszewski, J. Urbańowicz and W. Urbanski 233

On a Contact Problem for a System of Parabolic Equations in the Thermal Conductivity of Electric Machines: II: R. Małecki, P. Olszewski, J. Urbańowicz and W. Urbanski 249

The Kinetics Equations in a Multiplying Medium with Free Boundaries: A. Belleni-Morante and G. Lauro 263

Remarks on Non-trivial Solutions of a Volterra Integral Equation: W. Okrasiński 273

Issue No. 4, October 1990

A Boundary Element Galerkin Method for a Hypersingular Integral Equation on Open Surfaces: V. J. Ervin and E. P. Stephan 281

An Improved Boundary Element Method for the Charge Density of a Thin Electrified Plate in $\mathbb{R}^3$: V. J. Ervin, E. P. Stephan and S. Abou El-Seoud 291

Dissipative Maxwell's Equations at Low Frequencies: A. G. Ramm, O. L. Weaver, N. Weck and K. Witsch 305

An Integral Operator Related to the Stokes System in Exterior Domains: P. Deuring 323

The Resolvent Problem for the Stokes System in Exterior Domains: An Elementary Approach: P. Deuring 335

Minimal-energy Splines: I. Plane Curves with Angle Constraints: E. D. Jou and W. Han 351

Issue No. 5, November 1990

Continuous Dependence on the Heat Source and Non-linear Stability for Convection with Internal Heat Generation: B. Straughan 373

The Initial Boundary Value Problem for the Schrödinger Equation: L. Abrahamsson and H.-O. Kreiss 385

On the Uniqueness of Motion of Viscous Gaseous Stars: P. Secchi 391

An Optimal Control Problem for the Helmholtz equation in a Stratified Shallow Ocean: Y. Xu 405

Determination of an Unknown Function in a Parabolic Equation with an Overspecified Condition: J. M. Chadam and Hong-Ming Yin 421

An Asymptotic-Numerical Approach to the Coronal Loop Problem: F. Verhulst and P. A. Zegeling 431

Higher Moments for Kinetic Equations: the Vlasov–Poisson and Fokker–Planck Cases: B. Perthame 441

Issue No. 6, December 1990

Advective Estimates: J.-P. Loheac 453

On the Mathematical Foundations of Hyperthermia Therapy: J. Kremer and A. K. Louis 467

Non-homogeneous Non-linear Damped Wave Equations in Unbounded Domains: R. Racke 481

Asymptotic Expansions for Hyperbolic–Parabolic Systems with a Small Parameter: G. Kreiss 493
